HALL RENDER
KILLIAN HEATH & LYMAN
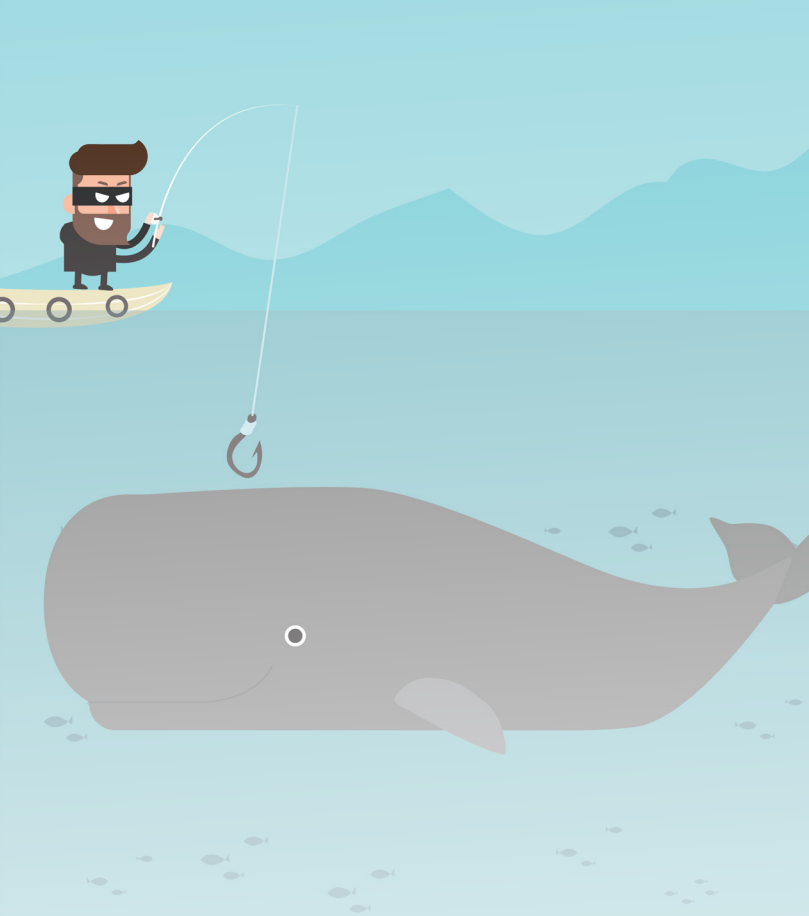

hallrender.com

WEDNESDAY, AUGUST 15 – THURSDAY, AUGUST 16
SWISSÔTEL CHICAGO

It is well known that health care is one of the favorite targets for cyberattacks given the rich trove of data. Hall Render's annual Health IT Seminar will look at health care privacy and security from the perspective of the ocean of data and the many threat actors that are phishing for ways to access and monetize that data for their own purposes. From an insider's view of an actual ransomware attack to new ideas on effective training for employees and board members to discussions on cyber insurance and the critical importance of managing business associate agreements, the seminar will provide context and practical approaches to help health care practitioners and entities navigate the most difficult privacy and security concerns that they are facing today.

Please join Hall Render attorneys, industry experts and other health IT leaders for this informative event.
